AMENDMENT A

RECEIVED

FEB 01 1999

GROUP 1700

TO THE ASSISTANT COMMISSIONER FOR PATENTS,

SIR:

In response to the office action dated September 22, 1998, please enter the following amendments:

Please amend claim 1 to recite:

Claim 1 (amended). A process for formulating a ruminant food ration; the process comprising:

- determining the methionine needs of the ruminant;
- identifying a plurality of natural or synthetic feed ingredients and the nutrient composition of each of said ingredients wherein one of said ingredients is a hydroxy analog of methionine selected from the group consisting of 2-hydroxy-4-(methylthio)butanoic acid, [or a] salts, amides [or] and esters thereof, and
- formulating a ration from the identified feed ingredients to meet the determined methionine needs of the ruminant which comprises one or more grains, [a] the hydroxy analog of methionine, and optionally a bypass fat wherein (i) [the hydroxy analog of methionine is selected from the group consisting of 2-hydroxy-4-(methylthio)butanoic acid and the salts, amides and esters thereof, (ii)] the hydroxy analog of methionine is added separately from any
